Getting Started

PublicVue allows the public to view actual flight tracks to/from Phoenix Sky Harbor International Airport (PHX) as well as from other valley airports. *Please Note: There is a 10 minute delay of live flight information due to security reasons.*

PublicVue is supported by most browsers, including Internet Explorer, Chrome and Mozilla, as well as from mobile devices.

To get started please go to this link: https://secure.symphonycdm.com/publicvue/?sys=PHX

At the Home page, you will see four (4) links in the upper left corner of your screen.

Home – This link will take you back to this Welcome screen.

Complaint – This link will take you to a Login screen where you can register, and then file a complaint. Creating a PublicVue account will save your location, easily allow you to file a complaint and view any previous complaints you may have made in PublicVue.

Flight Tracking – This link will take you to a map where you can view the flights valley wide, or enter your address to locate flights near your property. By clicking on a flight, more information and options, such as the ability to file a noise compliant, are available. *Please Note: Replay speed may vary due to system demand, internet connection and your own computer/device.*
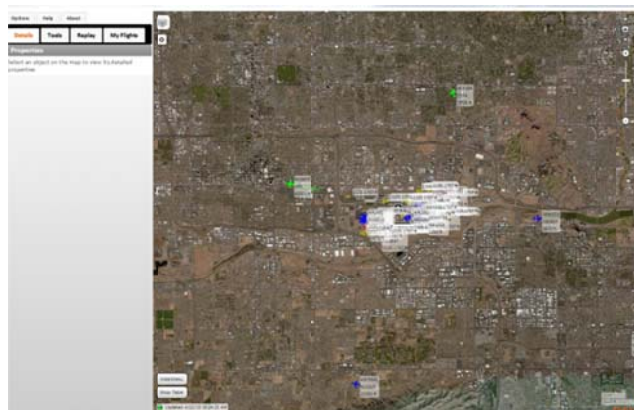

Contact Us – This link will give you additional contact information for the City of Phoenix Aviation Department.
