Heat Safety Tips

Drinking enough fluids is one of the most important things employees can do to prevent heat illness. The Occupational Safety and Health Administration recommends employees:

- Hydrate before, during and after work.
- Avoid energy drinks.
- Drink 1 cup of cool water every 20 minutes.

[osha.gov/heat](https://www.osha.gov/heat)

The airport maintains more than 270 water fountains with cool filtered water across the Phoenix Sky Harbor campus.

Read the Heat Ordinance

Phoenix City Code requires all contractors and their subcontractors who maintain a city contract, lease, or license to develop and implement a heat safety plan and post it where it is accessible to employees. All employees have a right to review their employer's plan and report instances of noncompliance. Scan to read the full heat ordinance.
